Trilogy Education Services

Re: Web Development Teaching Assistant

I am excited to apply for the Web Development Teaching Assistant position. I've been impressed with Trilogy's adaptability in an ever-changing market, and I'm excited to lead classroom discussions, guide inquiry, emphasize the meta-skills and core concepts of software engineering, support students in their projects and challenges, and provide feedback to students and TAs. Below are your requirements and my qualifications:

Your Requirements:

- Looking for talented individuals
- > who have a passion for teaching people how to code.
- HTML5 / CSS
- > JavaScript
- HTML5 / CSS3
- jQuery
- Node.js
- > React.js
- Git
- Command Line
- MySQL
- Sequelize
- > Demonstrated success teaching in classroom setting
- A positive attitude

My Qualifications:

- Recent graduate with course format and information fresh in mind. Peer recognized for having an answer to every new question and resources for old questions.
- Built Portfolio on HTML5 using emmet to expedite the process before easily weaving in CSS and JavaScript, including jQuery, to bring flair and functionality to the web.
- Prior to grasping MERN methodology and relying on React.js Apps, everything using JavaScript was best run via CLI using the version control of git to maintain code consistency. The commit history says it all.
- Before utilizing MySQL and its ORM counterpart Sequelize I was a United States Marine who as they would say 'always had a class in my back pocket'. I instructed Marines for eight years in many different topics and took a course on professional instruction.

These are only a few of my accomplishments. I look forward to speaking with you in more detail about my experience.

Sincerely,

Frederick Articulo
