Brand Statement:

Full-Stack Web Developer leveraging over 10 years of development across numerous frameworks and languages. Currently completing coursework toward earning a certificate in Full Stack Development from the University Of Richmond's Coding Bootcamp, with deepened skills in JavaScript, Css, Node.js, HTML, SQL, and responsive web designs. Known as a curious mind with a continuous focus on the next steps and continuous improvement. With each project, the goal is to use current knowledge to develop a stable platform from which to expand from the minimum viable product into the frontiers of technology. Having applied aspects of UX, UI, and agile development during projects working in a team of four to develop an app aimed at consumers interested in finding brick and mortar resources ranging from nearby schools, restaurants, housing, and more. Excited to leverage skills in the future as part of a fast-paced, quality-driven team in order to build better experiences on the web and develop more concise code for the future.
