## Summary

Full-Stack *MERN* Web Developer leveraging experience in  numerous frameworks and languages. Known as a curious mind with a continuous focus on the next steps and perpetual improvement. With each project, the goal is to use current knowledge to develop a stable platform from which to expand from the minimum viable product into the frontiers of technology. Excited to leverage skills in the future as part of a fast-paced, quality-driven team in order to build better experiences on the web and develop more concise code for the future.

## Technical Skills

MongoDB | Express | React | Node | CSS | HTML | Firebase | Git | CSS | Bootstrap | JavaScript | JQuery | Timers | Ajax | MySQL | Handlebars | Sequelize |API Integration | Heroku | User Auth | Java | CMS

## Projects

**Coding Portfolio** / [https://fkarticuno.github.io/CodingPortfolio](https://fkarticuno.github.io/CodingPortfolio) / [https://github.com/fkarticuno/CodingPortfolio](https://github.com/fkarticuno/CodingPortfolio)
Portfolio displaying progress and achievements developing basic, intermediate and advanced apps using various languages, packages, frameworks, engines and database models. All culminating into a demo friendly environment to showcase the expertise gained through countless hours of development and refactoring.
**Uses:** HTML CSS Bootstrap JavaScript JQuery GitHub-Pages

**Moneta** / [https://mc-moneta.herokuapp.com](https://mc-moneta.herokuapp.com) / [https://github.com/vin-cent321/Moneta](https://github.com/vin-cent321/Moneta)
Moneta is a full stack *MERN* platform for patients at any stage of Alzheimer's/Dementia to keep their mind and brain stimulated. Brain teasers/memory/image and word association games have been scientifically proven to be useful throughout the lives of people afflicted with the disease.
**Uses:** MongoDB Express.js React.js Node.js Axios Passport Moment OpenWeather-API

**Drinking Well** / [https://sheltered-spire-36283.herokuapp.com](https://sheltered-spire-36283.herokuapp.com) / [https://github.com/jckent/actual_malware](https://github.com/jckent/actual_malware)
This *MERN* app allows users to learn about mixology, and try new things by giving them recipes for random or user selected beveragesLeveraging express and node.js to provide server and routing, mysql for databasing,  passport.js for authentication while making calls to a robust beverage API to return drink names, images, ingredients,  measurements, and instructions along with a second API call to YouTube to provide an instructional video.
**Uses:** Bootstrap HTML CSS JQuery JavaScript MySQL Heroku Express Sequelize

**Eat-Da-Burger** / [https://eat-da-burger-fka.herokuapp.com](https://eat-da-burger-fka.herokuapp.com) / [https://github.com/fkarticuno/burger](https://github.com/fkarticuno/burger)
A restaurant style app that lets users input the names of burgers they would like to eat, when submitted the app will store the burger in its database, compile a JSON variant, and reproduce the updated list of burgers. While in the 'waiting area' burgers have buttons to trigger CSS changes on favorite and to devour the selected burger.
**Uses:** CSS Bootstrap HTML JavaScript MySQL Sequelize JQuery

# Work Experience

**Capital One;** Chester, Virginia                                        08/2015 - 05/2019
